OBJECTIVE

The purpose of this QR code is to provide customers with a faster, more convenient, and fully digital ordering experience. By simply scanning the QR code with their mobile device, customers can access the restaurant's menu instantly—eliminating the need to wait for a waiter or request a physical menu.

Once the QR code is scanned, the system automatically displays the complete menu in an intuitive and user-friendly interface.

Additionally, the menu content is dynamically translated into the user's preferred language based on their device settings, ensuring accessibility and a seamless experience for both local and international customers.

This feature not only streamlines the ordering process but also enhances operational efficiency, reduces wait times, and improves overall customer satisfaction.

Salmón con vegetales.

DOP \$1,200

Descripción del producto

Filete de salmón fresco, perfectamente sellado y glaseado con una delicada mezcla de miel y mostaza, que realza su sabor natural. Acompañado de una selección de vegetales frescos al vapor, como brócoli, zanahorias y calabacín, que aportan color, textura y un toque saludable al plato. Ideal para quienes buscan una opción ligera, nutritiva y deliciosa.

Agregar al carrito

Once all services are selected, they are automatically listed in the customer's digital shopping cart. From this section, users can continue adding more services, adjust quantities, or remove items as needed. The cart also includes a dedicated area for additional notes, allowing customers to send specific instructions to the kitchen –for example, adding or removing ingredients, adjusting preparation details, or requesting special accommodations.

The shopping cart provides a clear breakdown of the total cost, including itemized prices and applicable taxes. Tax amounts are calculated dynamically based on the policies of each individual restaurant, ensuring transparent and accurate billing before the customer proceeds to checkout.

After selecting the desired service, the customer is taken to a dedicated overview page that provides all the essential information they need before making a decision. This includes high-quality photos showcasing the presentation of the dish or service, a detailed description explaining its ingredients or features, pricing information, and any available customization options. The page is designed to give the customer a clear and comprehensive understanding of what they are choosing, helping them feel confident and informed before adding the item to their cart.

The Kitchen Dashboard is a centralized interface designed to help restaurant staff efficiently manage all incoming orders in real time. Its purpose is to provide cooks and kitchen personnel with a clear, organized, and up-to-date view of every service requested by customers.

Upon accessing the dashboard, the kitchen team is presented with a table displaying all active orders. Each row includes essential information so the staff can quickly understand what needs to be prepared:

- *Table Number: Identifies where the order belongs within the restaurant.*
- *Service Ordered: Shows the dish or list of dishes requested by the customer.*
- *Status: Indicates whether the order is Pending or Completed.*
- *Order Time: Helps the staff prioritize by showing when the order was placed.*
- *Price: Displays the total amount for the order (useful for cross-checking or coordination with waitstaff).*
- *Alerts: Small visual indicators (green or red dots) notify staff if the customer is requesting a waiter or asking for the bill.*

KITCHEN DASHBOARD

Order Details View

By selecting any order from the list, the kitchen team gains access to a detailed breakdown of that service:

- *Table Number: Clear identification of the customer's table.*
- *Full List of Items: A complete list of everything included in the order, displayed in an easy-to-read format.*
- *Order Status: Indicates if the service is still Pending or already Completed.*
- *Order Time and Price: Ensures accuracy and keeps the team aligned with preparation schedules.*
- *Customer Notes: A dedicated section where special instructions appear—such as ingredient modifications, allergies, or specific preparations requested by the customer.*

At the bottom, kitchen staff have a button labeled “Mark as Completed”, allowing them to update the order’s status once preparation is finished. This instantly updates the system so the waiter or the restaurant staff knows the service is ready to be delivered.

The screenshot shows a user interface for managing restaurant orders. At the top, there is a search bar with a magnifying glass icon and the word "Buscar". On the right, it says "ADMIN Dashboard". Below this, the title "Detalles del servicio" is displayed. A table provides a breakdown of the order details:

Número de mesa	Servicio	Estado	Hora del pedido	Precio
02	1 Pollo con puré. 1 Papas fritas 1 Agua mineral 1 Jugo natural de chinola	Pendiente	21:50	\$3,102.10

Below the table, there is a note field labeled "Nota del cliente:" followed by a text area. At the bottom right, there is a black button with the text "Marcar como realizado".
